Jeffrey Henne

The course is design to assist individuals who are working in healthcare facility management to prepare for taking the **Certified Healthcare Facility Manager (CHFM) Exam**. The program provides insight on the type of questions and subject material found on the exam. Using sample questions that a facilities manager would be expected to know, based on their knowledge, skill and experience, in the following areas:

Administrative and Finance; Operations and Maintenance, Regulatory Compliance and Standards, Planning, Design and Construction. The information presented in meant to: validate and review typical business practices; review terms, systems and organizations the facility manager encounters; provide information and insight using the resource materials; help facility managers to become more efficient in their jobs; and assists in preparing for the Certified Healthcare Facility Manager Exam.
